SAR GEMS (THAI)CO.,LTD

SAR GEMS is proud to present the very best selection of INDIAN SILVER BEADS AND COMPONENTS

All of beautifully hand-crafted beads and components are manufactured by our skilled craftsman's, based in the beautiful PINK CITY of India – JAIPUR, from molds or totally by hand, and as a result add a distinctive look to jewelry designs.

As we manufacture all of these in our own factories so we are able to offer our esteemed customers the lowest wholesale prices and the finest quality.

Explore our entire range of Silver Beads, clasps, findings, Bulk chains in four different finishing of Oxidized Silver, Matt/Brushed Silver, Shiny Silver and Vermeil finishing, giving the components a unique appearance which further adds a bit of flavor to jewelry.

These beads and components comes in a variety of shapes and sizes like: silver round bead, bead cap, clasps, tube, saucer, dome roundel, miscellaneous shapes like hearts, shell, drop, flower, triangles, roundels, buttons, etc.

The Indian Silver beads and components offered by SAR GEMS are composed of at least 92.5% silver, which is the legal requirement for "sterling silver" products. Silver is most commonly mixed with 7.5% copper to make it more durable, because pure silver—also known as "fine silver"—is very soft.

Sterling silver can easily tarnish when exposed to contaminants in the air, as well as oil and salt in skin. Lightly tarnished pieces can be cleaned with a polishing cloth or silver liquid cleaner, however in its advanced stages; tarnish is more difficult to remove.

Because all of these beads and beading components are handcrafted, pieces may vary slightly in design, size, or weight, which adds to their unique charm.

So enjoy our catalogue and we look forward to receive your orders and enquiries soon.
